

Email, Collaboration, Instant Messaging, and More - Trusted by Businesses Worldwide

Key Features and Benefits

- Virtual, hosted, or on-premise deployments
- Intuitive mobile device management console to easily manage mobile devices. View, set and change mobile device policies (lock, remote wipe, etc.)
- Monitoring and alerts to notify the administrator of suspicious activities
- Strong email security and deliverability using DMARC, DKIM, SPF, email & attachment encryption, spam filtering, AI spam learning, SSL/TLS, backscatter protection, spambot detection, and much more
- Security policy tools such as application passwords, password complexity settings and two-factor authentication
- Flexible outbound email management using custom delivery schedules and mail queues
- Centralized management of email client signatures
- Integrated web-based email (MDaemon Webmail) delivers full collaboration, web conferencing, message recall, appointment booking, and more
- Public folder ticketing system using any email client
- Integrated instant messaging with support for popular IM clients
- Microsoft Outlook compatibility
- High availability multi-server clustering support for protection against service interruptions

The MDaemon Email Server is trusted by businesses in over 140 countries around the world, providing reliable and secure email without expensive administration or high per-user costs. The Windows-based software is easy to manage and offers email, webmail, collaboration, mobile device management, and more.

MDaemon Webmail - Web-Based Email, Collaboration & More

MDaemon Webmail provides seamless communication, file sharing, and collaboration - with integrated contacts, tasks, shared documents, voice memos, notes, web conferencing, and instant messaging.

Identify Suspicious Emails

Meeting Next Week

10/4/2024 9:34

from user.one <user.one@example.net>

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Frank,

We are having a meeting next Friday at 10:00. Can you attend?

Thank you.

Message security warning, along with full "From" name and sending address helps users identify suspicious senders and spot possible phishing attacks.

Email Account Hijack Detection

MDaemon®

Hijack Detection

Save

Cancel

Recommended

☒ Limit messages sent from reserved IPs to

500

messages in 30 minutes

☒ Limit messages sent from local IPs to

500

 messages

Prevent domain blocklisting by detecting and disabling an account that may have been compromised and used to send spam.

Block Suspicious Connection Activities

MDaemon®

SMTP Screening

Save

Cancel

Recommended

☒ Block IPs that connect more than

5

times in

5

minutes

SMTP Screening helps prevent dynamic DoS, dictionary, and brute force attacks by blocking connections based on suspicious behavior.
