

Advanced Management

For Acronis Cyber Protect Cloud

SIMPLIFY CLIENT PROTECTION MANAGEMENT AND PATCH AUTOMATION

Spend less time juggling solutions and more time focusing on managing, monitoring and protecting your clients' data, applications and systems. Adding Advanced Management to Acronis Cyber Protect Cloud enables you to automate your daily tasks and proactively mitigate existing vulnerabilities with patching of open security gaps for clients.

OFFER MORE SERVICES AND REDUCE ENDPOINT PROTECTION MANAGEMENT BURDEN

OUT-OF-THE-BOX SCRIPTING

Automate routine tasks like provisioning, configuration and maintenance with ready-to-use, Acronis-verified scripts you can easily customize — or create your own.

AUTOMATED PATCH MANAGEMENT

Keep client systems up to date and close security gaps with integrated vulnerability assessments and automated patch management for 270+ applications.

COMPREHENSIVE MANAGEMENT TOOLS

Streamline your planning with software inventory collection and disk drive health monitoring.

PROACTIVELY PREVENT VULNERABILITY EXPLOITATION	INCREASE SERVICE EFFECTIVENESS AND REDUCE MANAGEMENT COMPLEXITY	STREAMLINE YOUR WORKFLOWS AND SAVE RESOURCES
• Keep client systems up to date • Proactively prevent attacks from taking advantage of system vulnerabilities • Remediate gaps in client defenses • Enable better vulnerability management with fewer resources	• Increase the efficiency of your MSP technicians, minimize human errors and automate routine tasks like provisioning, configuration and maintenance through scripting. • Save time and effort while keeping systems up to date with automatic patching • Eliminate the risk of downtime due to failed patches • Address vulnerabilities faster • Strengthen compliance — set specific deadlines for applying patches	• Reduce management burdens — more efficient management of clients and their workloads with less resources • Leverage a library of Acronis-verified scripts that can run on demand, on schedule, or when start conditions are met • Gain thorough visibility over data protection, assets and applications • Proactively minimize unplanned downtime due to disk failure • Deploy your resources more effectively and efficiently

BUILT ON TOP OF ESSENTIAL TOOLS FOR MANAGING CLIENTS' PROTECTION, INTEGRATED WITH BACKUP AND CYBERSECURITY

Centralize protection management with a single solution that integrates backup, cybersecurity and workload monitoring and management: Acronis Cyber Protect Cloud. Add Advanced Management to automate routine tasks via scripting, proactively patch vulnerabilities, improve clients' uptime in case of failed patches and disk drives issues, and remotely access managed workloads.

ACRONIS CYBER PROTECT CLOUD INCLUDES:	ADVANCED MANAGEMENT ADDS:
Essential tools for visibility into data protection and remote assistance, integrated with cyber protection. Seamlessly provision endpoints, centralize management, and leverage a single-pane-of-glass for increased visibility into security gaps.	Expand your cyber protection services with integrated patch management and automate routine tasks via scripting while reducing the time and effort needed to monitor, manage and maintain your clients' workloads. Enable wider solution consolidation, proactively mitigate security gaps and improve uptime, and reduce manpower involvement.
▪ Centralized and group management ▪ Auto discovery and remote agent installation ▪ Security gap and vulnerability assessments ▪ Hardware inventory collection ▪ Remote desktop assistance ▪ Report scheduling	▪ Out-of-the-box cyber scripting: Automate and streamline repetitive / day-to-day workload monitoring and management tasks with Acronis-verified set of scripts or scripts created by your IT administrators. ▪ Automated patch management: Close vulnerabilities before they're exploited ▪ Software inventory collection: Save time and effort when preparing, planning, or tracking updates with a complete list of software used by clients ▪ Drive health monitoring: Proactively mitigate downtime caused by disk drive failure with predictive monitoring and alerts ▪ Fail-safe patching: Recover from faulty patches quickly and easily with automatic system backups before patching

EXTEND PATCH MANAGEMENT TO MORE THAN 270 WINDOWS APPLICATIONS
